Dear Mr. Block,

I note that you are hosting an event regarding the quantification of cyber threats.

We were the first company to develop the software and methodologies to enable this to be attained, starting in 1999, with the first commercial software release in Europe in 2009, and in the US at RIMS Boston in 2010.

You might also be interested in reading the specification of our granted US patents 12/811,208 and 13/322,298 which are detailed and broad in the methodologies and how financial quantification can be achieved.

The market is indeed (finally) moving towards the mindset of "it will happen so how much will it cost us" after decades of it being a matter solely for I.T. security.

Information on our company can be found at <http://www.quantarcyber.com> which has been put up in advance of us seeking out any US companies infringing our patents, which should give you an overview of how we are able to achieve quantification.

Yours sincerely

Dr. Phillip King-Wilson
